Smartband Runner

The Runner smartband is the perfect support for all sports enthusiasts, an indispensable tool to track your every move. Designed to monitor everyday activities, it features functions such as steps taken, distance covered, calorie count, alarm clock and sleep counter. The functions are selected using a button on the side and signalled by a vibrating alert. To use the device, simply connect it to your smartphone via Bluetooth. Once connected, the smartband allows you to take pictures remotely and, thanks to the localisation function, it is also capable of signalling when your phone goes outside the Bluetooth range. This model is in soft silicone, it is fitted with a 55 mAh rechargeable battery with a life of over 15 days in stand-by, and it can withstand occasional exposure to water or rain. Available in black, it can be customised with your laser-engraved company logo on the metal plate fitted on the strap.
