100% Custom USB flash drives

Our 100% Custom USB flash drives can be distinguished between 2D and 3D.

2D designs have simple geometric shapes (with square, rectangular, round base, etc.) while 3D designs have all-round shapes with simple or highly complex shapes and a superior degree of detail.

For both, costs vary according to the flash drive storage capacity and to the number of colors you want to use: you can choose up to 5 colors (including the background color).

Product code
usb_9996
