# 2in1 Magnetic Cable

USB cable with double Micro and Lightning connector, suitable for both data transfer and for charging devices up to 2A. When the two connectors at either end are not in use, they remain firmly joined together by a magnet, and thanks to the metal loop the cable can also turn into a practical keyring. Both the silicone cable, which is available in various colour variants, and the connectors can be customised with silk-screen printed company logo.

Product code  
CB004
