# Phone Ring

Smartphone support for attaching to the back of a phone, featuring an adhesive surface on which a metal ring is hooked to help steadily and comfortably hold the device. In addition to ensuring a secure support for phone calls and taking photos, the Phone Ring is also a multi-purpose accessory: it supports the smartphone in a horizontal or vertical position for watching videos or making video calls, and can be used as a cable reel for headphones. The rectangular base, available in different colors, can be personalized with silk-screen printed company logos.

Product code  
GD013

Materials  
Plastic.
