# Shadow – TWS

Shadow are the TWS earphones with an in-ear capsule featuring a minimal, discreet design. They're designed and made with innovative True Wireless Stereo technology which lets you connect the two completely wireless earphones at the same time. Shadow earphones ensure excellent playback, guaranteeing a powerful, defined sound without any distortion. Thanks to the practical pocket-size case with built-in charger, you can recharge the earphones whenever you like up to 3 times in a row and then stow them away conveniently and safely once you've finished using them. The case can be customized with a company logo in pad printing or laser engraving.
