# Smartband easy fit HR

Smartband Easyfit HR is the new touchscreen fitness tracker with heart rate monitor that's perfect if you want to work out yet continuously monitor your everyday life in a simple, user-friendly way. The heart rate sensor is useful for always keeping your pulse rate under control during every stage of your training, from your warm-up to your cardio and through to your warm down. The other fitness functions include a step-counter, a distance travelled indicator and a calorie-monitor. The Easyfit HR touch display can be activated by simply moving your wrist and lets you keep track of notifications from any apps you're using, while also providing a preview of incoming calls. Available in black, it can be customised with your laser-engraved company logo on the metal plate fitted on the strap.

Product code  
SBC01
