Power Manta 8000

Power Manta 8000 is the thin, fast and powerful portable charger made with lithium polymer cells and equipped with a USB Fast Charge port and a USB-C port, so it's perfect for charging any compatible devices. With its simultaneous charging system, you can charge your phone and powerbank at the same time with a single charger. Power Manta S 8000 is also equipped with a practical digital LED display that shows the exact residual charge level, so it's simpler and easier to know when it's time to recharge the power bank. What's more, the lightweight, ultra-thin design created with soft-touch, non-slip material makes it a practical, functional accessory that looks great too. Power Manta 8000 is available in black and can be customized with digital printing.
