Oval

Multi connector equipped with standard USB cable, micro USB cable, Lightning cable and Type C cable, all with 2A capacity and which can be used to charge smartphones or other devices. The hub from which the four cables emerge, which is black in colour, can be customised with an LED logo, a method that emphasises the logo thanks to the internal LED light, which switches on when the cables are linked to a device. The cables are covered with a black nylon fibre fabric, which, together with the keyring hook and chrome-effect details, creates a pleasant contrast of colours and makes this accessory more than just a functional item.

Product code
CB007
