Caddy

Cardholder with RFID lock that ensures electronic card data theft and completely isolates the cards from any magnetic sources. The satin-finish aluminium shell, available in black, silver and red, also protects cards from physical impacts and damage. It contains up to 5 cards, and a small lever/latch mechanism quickly releases them from the holder, displaying them in a way which is easy to recognise and extract them. This light and compact cardholder is a suitable business gift, perfect for all budgets. It is customisable with the company logo on both sides thanks to laser incision, a technology which can design a logo which is almost indelible and ensure a long-lasting result.

Product code
GD016
