Wireless Pad

The Wireless Pad is a mouse pad that also act as a 5W wireless smartphone or mouse Bluetooth charger equipped with induction-technology. The base of the pad is made of anti-slip rigid plastic, while the top surface is covered in synthetic leather. In addition to making the work surface more functional, this promo gift offers ample space for CMYK customisation. The area for charging is indicated by a light embossed marking which does not interfere with the graphics and ensures correct use of the charger. The product includes a 100 cm cable to connect the pad to the computer's USB port.
