Catch

Smartphone support to attach to the back of the phone or the cover, equipped with a metal ring which ensures a safe grip for making phonecalls and taking pictures. Phone Catch holds the smartphone vertically and can also be used as a cable winder for earphones. The ring can rotate 360° and, thanks to its flat surface, it adheres perfectly to the back of the phone when it is not in use. As it is made of metal, Phone Catch can be used even with magnetic supports for smartphones, for example, the ones used in cars. The round base is customisable with the company logo thanks to laser incision.

Product code
GD017

Materials
Metal.

Delivery days
10

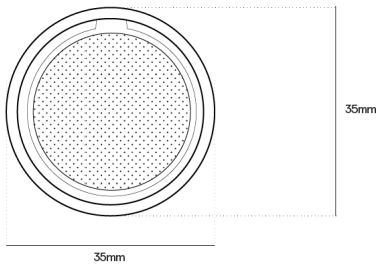

Front Customisation
Laser Engraving.

Size
3,5 x 3,5 cm

Packaging
Polybag, White Box.

Print Area
2,3 x 2,3 cm
