Gravity Holder

This is a smartphone support for cars which connects to the air vents and enables you to interact with your smartphone (e.g. to follow the instructions of the navigation device or make calls on loud speaker or via Bluetooth) without interfering with your driving. A ball pin allows you to angle your phone safely in any direction. The support self-regulates width and extension and is therefore compatible with devices of any size. Anti-scratch silicon buffers ensure a safe grip and allow drivers to insert or pull out their phones with one hand. The product is customisable with silk-screen and CMYK printing logos.

Product code
GD024

Materials
Plastic.

Delivery days
15

Front Customisation
Silk-screen Printing,
CMYK printing.

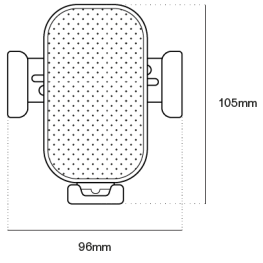

Size
9,6 × 10,5 × 9,9 cm

Packaging
Crystal box black,
Crystal box white.

Print Area
7,5 × 3,8 cm
