Fence

USB data blocker is a USB adaptor which acts like a filter when you are charging your phone from a public source which is considered to be unsafe (for example, USB ports in an airport). The device impedes the transfer of data (both incoming and outgoing, such as malware), allowing only for the power required to charge the battery to be used. This product is available in white and can be customised with a silk-screen and CMYK printing logo.

Product code
GD033

Materials
Plastic.

Delivery days
10
