# Z-drive

Plastic and metal USB flash drive that is ultra compact as a result of the latest generation COB chip. This model is much more manageable as a result of the dotted surface, which makes it easier to slide it open. It also has a functional slot at the end to apply accessories. Z-Drive is a model exclusively manufactured by Maikii. In 2009, its design won the IF Design Award. It can be customised on both sides with silk-screen printing and laser engraving.
